Rapid Station

10 GPM Fill Rate

Fills autoscrubbers and mop buckets 2-4 times faster than conventional dispensing equipment.

Rapid Station Includes:

- Proportioning unit
- Instructions
- Watts vacuum breaker
- 10 ft. discharge hose
- Metering tips
- 8 ft. product supply hose
- Ceramic Weight
- Stainless steel check valve
- Bung adapter
- Mounting hardware

Rapid Station Drum Dispensing:

Assemble product supply hose, insert appropriate tip and attach supply hose to inductor. The Rapid Station dispenser fills auto scrubbers and other large reservoirs at 10 gallons per minute (37.8 liters per minute) 3 minutes for a 30 gallon tank. Unit includes a built in vacuum breaker, 10 feet of discharge hose, and metering tips. Stainless steel cover and brass internal components offer durability and long service.

One Button

One Button modular dispensing system can be ganged together, One Button's modular design lets you easily couple together any number of stations to create a system to meet facility needs. Versatile dispenser allows user to build the system they require or mount units individually.

Part number 421321 includes Action Gap backflow with 4 gpm (16 liters/minute) proportioner, tip kit, chemical hose assembly with weighted end, discharge hose with hanger, water supply hose, mounting hardware and instructions.
