We partner with distributors to help our customers clean better, faster, and safer.

An email Newsletter from Multi-Clean

Dear Readers,

Flu Season is nearly upon us. This is where cleaning and sanitation pro's can take a leading role to reduce illness related absences.

A recent informal poll found that a majority of school superintendents have lofty attendance goals in the 97-99% range.

Its not just schools, all of your customers are impacted by the flu and other contagious illnesses.

Consider the questions below with answers contained in this newsletter:

What can you do to help schools reach attendance goals?

What can you do now to make your customers ready to tackle flu and other seasonal illness outbreaks?

What can be done to make cleaning staff more productive?

What resources are available to help reduce illness related absentee rates?

Recently, our vendor partner, Victory Innovations concluded their KEEP Kids Healthy Campaign where E-Spray Hand Held Units were

Keep Kids Healthy Campaign Survey of School Superintendents

Q. Do you have an Infection Control Protocol in Place? 37% have none. *Comment: we expect many others have very limited processes in place to deal with flu and other outbreaks.*

Q. What is the attendance Goal for your District? 68% said the goal was 97-99%. *Comment: A lofty goal indeed, we expect the current absentee rate is in the low 90's if not lower during the height of cold and flu season..*

Q. What is the worst trouble spot? The #1 answer was classrooms. *Comment: We suspect cafeterias, locker rooms, hall lockers and buses might be bigger cultivators of germs. But certainly classrooms are important.*

High Touch Cleaning and Disinfecting

An important component in any infection control plan is identifying frequently touched surfaces and developing a cleaning and disinfecting protocol for these surfaces.

HIGH TOUCH CLEANING CHECKLIST

In our latest technical bulletin, we lay down a step by step guide on developing a high touch cleaning and disinfecting program. The handy High Touch Checklist helps identify and rank various high touch surfaces in any facility.
