YOUR GUIDE TO CLEAN

December 2018

December Holiday Hours:

CLOSED: December 24, 25, 31, and Jan. 1st.

NOTE: We will be open and shipping (weather permitting) on Dec. 26, 27, 28. Please plan ahead as shipping can be delayed or limited during the holidays.

We partner with distributors to help our customers clean better, faster, and safer.

An email Newsletter from Multi-Clean

Dear Readers,

The holiday season can be a time when germs are easily passed (lots of eating and holiday parties). Foodborne illnesses are often highly contagious, so arming yourself with reliable information can help keep your customers healthier and safer.

The new year also means schools are back in session and the FLU season begins in earnest.

"We did studies in which we disinfected desks once a day and cut absenteeism by 50%".

This quote is attributed to Dr. Charles Gerba and is part of a must read article titled GIVING GERMS MORE ATTENTION, The high touch surfaces in offices, schools, and hospitals that require more disinfecting. Scroll to the bottom of this newsletter to find a direct link to this article.

In this issue

Disinfecting

Reducing absenteeism with less labor

Stomach Flu

The #1 Cause of Food Poisoning is..

Disinfecting Against Ringworm

Ringworm is common in schools

Featured Products

E-Spray
#128 E-Fecticide
One Shot Century Q
Disinfecting Tablets
Microcide TB

BLOG

Wishing all of our loyal distributors and newsletter readers a very happy and safe holiday season.

Thanks for reading

Mike Tarvin

Got Extra Labor??

Germ Hot Spots

While it is easy to talk about the benefits of more frequent disinfecting, the reality is that there is rarely more labor to throw at the problem.

This is where **E-Spray** (electrostatic spray) Disinfecting comes in. A single person can disinfect large surface areas in a short amount of time. Desks, chairs, tables, hand rails, and many other surfaces are easily disinfected.

E-Spray is a tool that distributors can use to overcome labor deficiencies and produce real results, particularly in education (pre-school, K-12, university), and healthcare (hospitals, nursing homes, clinics, assisted living).

The Stomach Flu.....What causes it?

What we refer to as the stomach flu is really not the flu at all. Gastroenteritis is the term often used. Often highly contagious, it can shut down schools, cause death amongst the aged or those already sick.

What virus is responsible for most stomach flu cases?

How do you get stomach flu?

How do you disinfect against pathogens that cause stomach flu?

Disinfectant Contact Time: Is it important?

We are seeing and hearing more about disinfectants that have faster kill times than the standard 10 minutes. Is disinfectant contact time important to reducing infection rates?
