Cleanliness of Public Facilities is taking on a New Meaning during the COVID-19 Pandemic; It’s about making People Feel Safe.
Electrostatic Spray Technology is simply the most Efficient and Effective Method for Application of Disinfectants over Large Areas.

**Faster:** 70% Faster Application: The E-Spray System rapidly applies validated disinfecting solutions.

**Safer:** Electrostatic Wrapping: The E-Spray System’s charged droplets reduces overspray and airborne mist.

**Better:** 65% Less Chemical: The E-Spray System uses less and achieves more uniform coverage.
Disinfectants for Use Against Human Corona Virus

128 E-Fecticide Disinfectant Cleaner
Concentrated, Hospital Grade, fast kill, 1 step disinfectant.
EPA Registration no.: 6836-365
Package: 2 Liter Multi-Task or 1 gallon bottle
Dilution: 1 oz per gallon of water (1:128)
Yield: 272 quarts per 2 Liter, 516 quarts per gallon
Contact Time: 5 minutes

64 Millennium Q Disinfectant Cleaner
Concentrated, Hospital Grade, 1 step disinfectant cleaner.
EPA Registration no.: 1839-95
Package: 2 Liter Multi-Task or 1 gallon bottle
Dilution: 2 oz per gallon of water (1:64)
Yield: 136 quarts per 2 Liter, 258 quarts per gallon
Contact Time: 10 minutes

Peroxi-Cide
Hydrogen Peroxide, ready to use disinfectant cleaner
EPA Registration no.: 6836-385
Package: 12 quart case
Dilution: Ready to Use
Contact Time: 3 minutes

Microcide TB
Ready to use, rapid Kill disinfectant cleaner
EPA Registration no.: 1839-83
Package: 12 quart case
Dilution: Ready to Use
Contact Time: 3 minutes or less (Kills SARS-COV-2 in 60 seconds)

CLEANING IS ESSENTIAL
Facilities Management and Custodial Staffs are going to be at the Heart of Developing Confidence amongst Employees, Customers, Students, & Visitors.
