

### Tired of Talking About Disinfectants?

While progress is being made on the pandemic front, businesses and schools are re-opening, so disinfecting remains a top of mind issue. Soon, we hope we can turn our attention to other cleaning processes and associated products. But this month's newsletter remains focused on disinfecting solutions with information on disinfecting against COVID variants, the need to disinfect vehicles, and how E-Spray disinfecting helps keep students and staff safe from COVID.

### What's Dirtier? Your Steering Wheel or A Toilet Seat

A study by Ashton University found 700 distinct types of bacteria on car steering wheels compared to a mere 60 types on a toilet seat. So let's discuss the process of disinfecting your own vehicle. And, if you have a customer with a fleet of vehicles, you will be able to educate them on properly disinfecting the interior surfaces.

### Peroxi-Cide Disinfect-Deodorize-Clean Powered by Hydrogen Peroxide..

Peroxi-Cide is part of a new class of disinfectants that uses hydrogen peroxide as the germ killing ingredient.

But, hydrogen peroxide helps do more than just kill germs....

- Helps rejuvenate tile and make grout look like new again.
- Removes water spots and soap scum all while preventing hard water build up.
- Destroys foul odors from urine and other biological malodors.

Use Peroxi-Cide as a general bathroom cleaner-disinfectant, or as a general disinfectant for all surfaces.

3 Minute kill time.

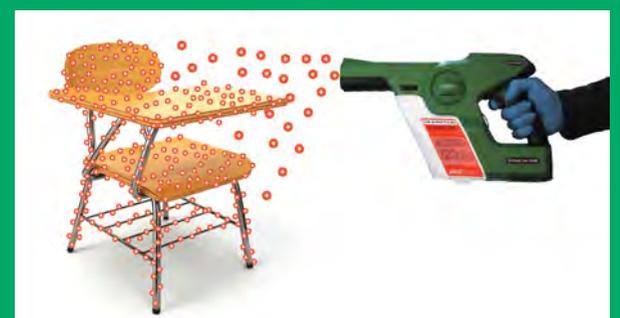

EPA LIST N Approved.
